1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-25 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Pat. No. 5234987 Hubbard et al. in view of US Pat. No. 6268422 Weih et al..

Hubbard discloses the instantly claimed inventions with the exception of the use of water and the VOC of the instant claims. It would have been obvious to one of ordinary skill in the art at the time of the instant invention to use the compositions of Hubbard in the form of low VOC aqueous dispersions because the EPA has regulated organic solvent emissions and because Weih shows that similarly hydrophobic rubber adhesives can be used in aqueous dispersion form which would have been expected to minimize the EPA regulated emissions.
